

# Mobility and quality of life

For our cities and rural communities

@Felix Kästle

Baden-Württemberg

MINISTRY OF TRANSPORT

Baden-Württemberg is driving the transformation of the transport sector.

We are committed to reduce CO<sub>2</sub> emissions from transport by more than half by 2030.

That is why we reshape mobility for our citizens in urban areas and rural communities. Our goal is to promote a new form of mobility that improves our health and raises the quality of life. It will enable everyone to participate actively in society while protecting our climate.

We are pursuing a transition to electric mobility and other climate-friendly technologies. We are committed to overhaul the mobility sector by switching to environmentally-friendly forms of transport.

That is why our public transport services have experienced a massive upgrade in recent years. We have made it easier to use buses and trains. What is more, we have extended the network of attractive cycle paths and footways.

We invite you to explore the goals and issues that are being pursued by the Ministry of Transport and join us in achieving sustainable mobility.

Winfried Hermann MP  
Minister of Transport  
Baden-Württemberg

Elke Zimmer MP  
State Secretary

Berthold Frieß  
Director General

# Ministry of Transport fields of activity

car-sharing

autonomous driving

digital roadworks management

mobility data

noise from motorcycles

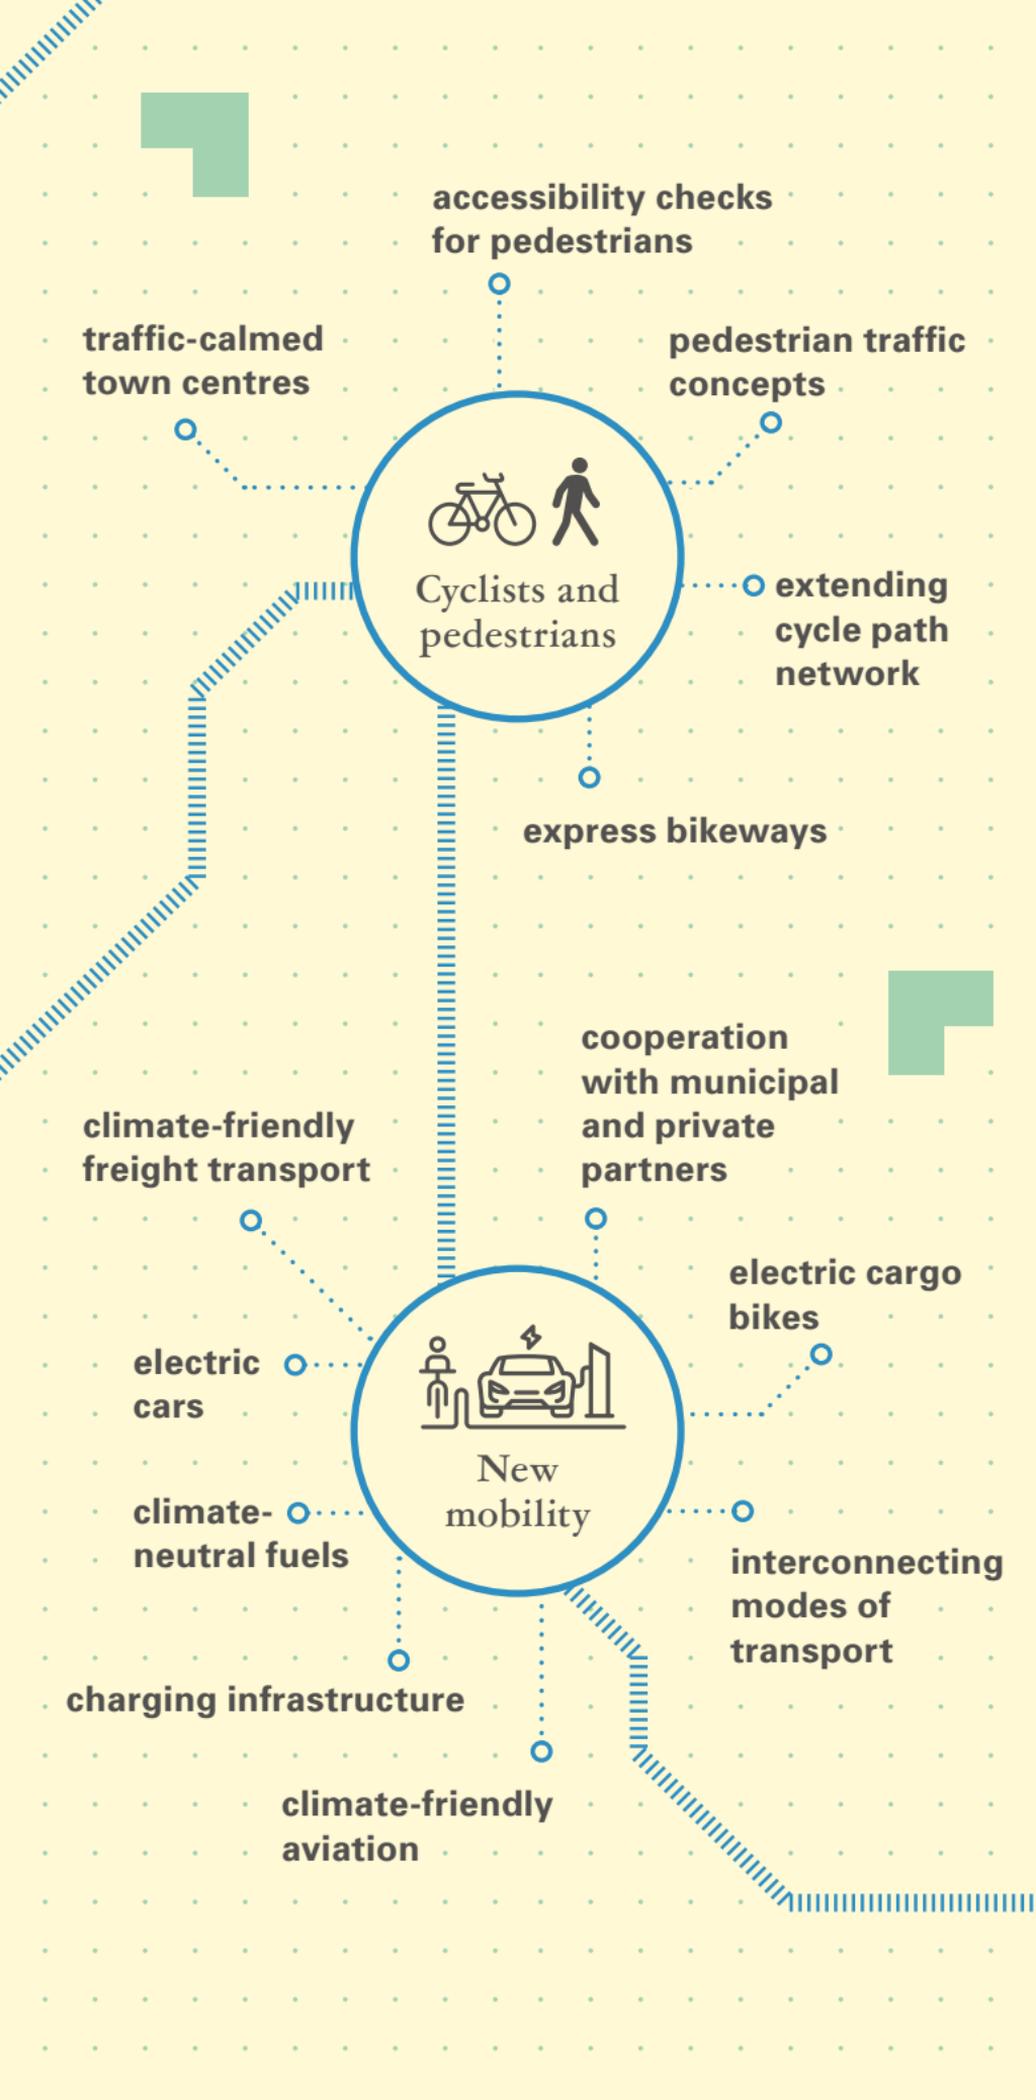

noise action plans

climate action and adaptation

Tackling emissions and noise

speed limits

measures to ensure air quality

**regional buses and on-demand transport services**

**expanding services and infrastructure**

**reactivation of railway lines**

**mobility incentives for local authorities**

**fares**

**digital rail**

**community buses**

**reliable and regular mobility services**

**environmentally-friendly propulsion systems**

**accessibility**

**traffic information**

**nature conservation**

**road maintenance services**

**maintaining roads and bridges**

**road safety**

**sustainable road construction**

# Our goal: transforming the transport sector by 2030

**Double** the use of public transport

**One in two** cars is powered by renewable energy

**-55%  
CO<sub>2</sub><sup>\*</sup>**

*\* compared to 1990*

**Half** of all freight is transported by climate-neutral means

**One in two** trips is done walking or by bike

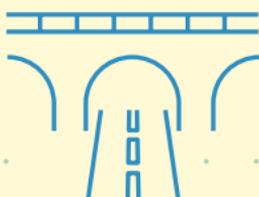

**One fifth** less car traffic in cities and rural areas

# Our work in numbers

**7,300**

**bridges**  
on federal and  
state highways

**8,000**  
**kilometres**

cycle path  
network called  
RadNETZ BW

**1.75**  
**million**

train journeys  
per year

**11** million  
pedestrians
